Wood Paletten Express Service is one of the first pallet manufacturers in Ukraine and the leader in the modern market. The production facility is located in Transcarpathia region, in the ecologically clean area, which lets us use only natural raw materials for all our products. Besides its head office, W.P.E.S. is represented by the branches in four countries and has its own fleet, so our customers receive the most suitable conditions of the cooperation.

KEY FACTS

more than 20 years
in the wooden packaging
market

- 3.** production of pallets according to individual parameters
- 4.** purchase and repair of used pallets and delivering them by our own transport
- 5.** renting and exchanging pallets
- 6.** maintenance and renovation of the client's stock of pallets

COMPANY VALUES

Ecology

We care about the environment through the sale of waste-free production. Besides we buy used pallets of any kind of damage, poor quality and fake pallets.

People

Professionalism at every stage of production, sales and service delivery is one of the key guarantees we give to our customers. That is why W.P.E.S. employees receive regular training and have opportunities for personal development and career growth. Teambuilding and an individual approach to each employee motivation are important components of the company.

Innovation

W.P.E.S. has developed a process management approach that promotes continuous optimization of production while increasing its efficiency. We also use the Theory of Constraints system in decision making, which gives us the opportunity to manage our most limited resource - time.

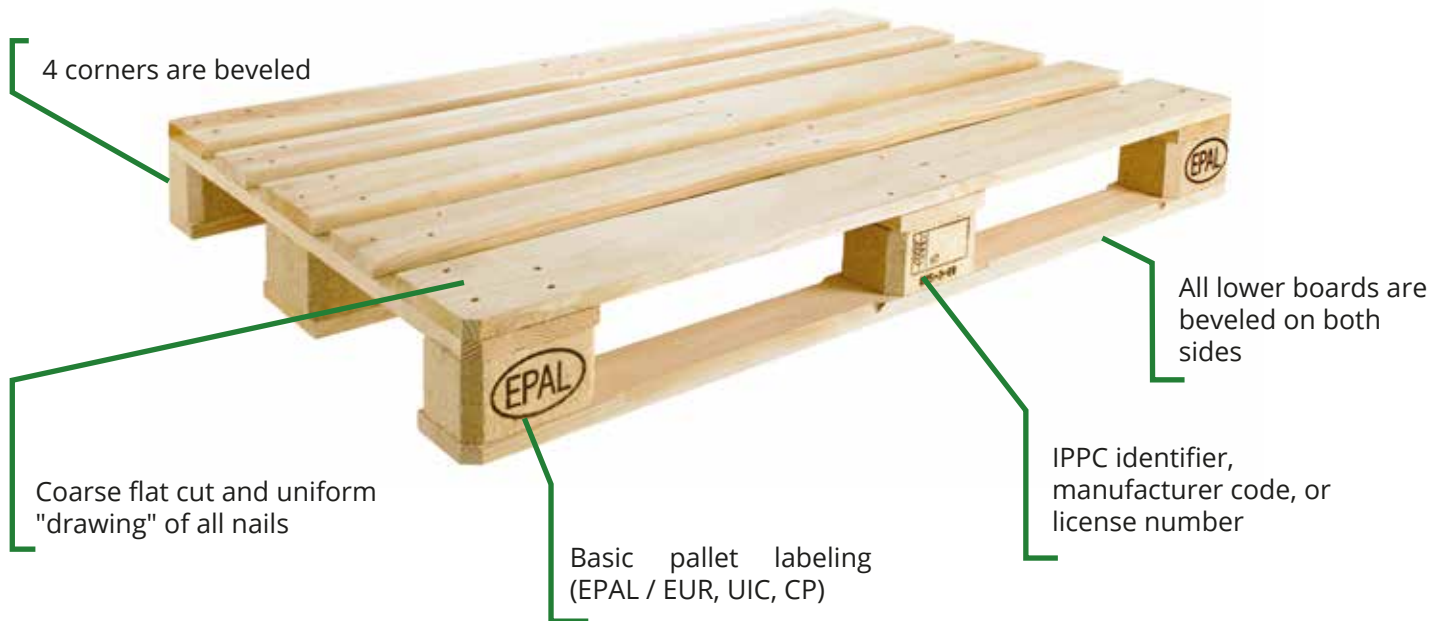

LICENSES

WPES is a certified manufacturer of pallets that comply with UIC 435-2 and are marked with the EPAL quality mark. We also have a license to manufacture CP-type pallets and fix EPAL pallets.

The European Pallet Association (EPAL) is an internationally recognised association of European pallet manufacturers. Having the license from this organization guarantees that all manufacturing processes will be adhered and a high quality of standards will be ensured.

QUALITY STANDARD: HOW TO IDENTIFY THE RIGHT PALLET?

No signs of use, light coloured wood, no damages

TYPES OF OUR PRODUCTS

EPAL / UIC PALLETS

EPAL PALLET TYPES:

-  **EPAL** - 1200 x 800 mm
-  **EPAL 2** - 1200 x 1000 mm
-  **EPAL 3** - 1000 x 1200 mm

THE EPAL CERTIFICATE GUARANTEES THAT THE PALLETS YOU PURCHASE WILL BE:

-  Timber of the highest quality
-  Turdy and durable construction
-  Loading capacity up to 2000 kg
-  Long lasting term of circulation

CP PALLETS

CP pallets are designed to be used in the chemical industry, most often used in the transportation of cardboard boxes, bags, canisters and containers of bulk materials.

TYPES OF CP PALLETS:

CP-1 - 1000 x 1200 mm for cartons and bags

CP-2 - 800 x 1200 mm for cartons and bags

CP-3 - 1140 x 1140 mm for loading barrels

CP-4 - 1100 x 1300 mm for bags

CP-5 - 760 x 1140 mm for small containers, such as boxes and cases

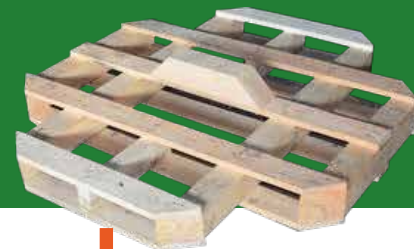

CP-6 - 1200 x 1000 mm for bulk sacks

CP-7 - 1300 x 1100 mm for bulk bags

CP-8 - 1140 x 1140 mm for container transportation

CP-9 - 1140 x 1140 mm for containers, barrels and oversized loads

CUSTOM MADE PALLETS

We manufacture pallets of all sizes and configurations, with a variety of top and bottom boards and blocks. Before production we design and present a project according to the client requirements. The company specialists select high quality types of wood, which have adequate strength parameters, so that pallets can withstand maximum load. We send the pallets for production only after the sketch is approved by the client.

USED PALLETS

We are actively buying used pallets, restoring their working condition and bringing them to the level of almost new pallets.

TYPES OF USED PALLETS:

- 1st grade (light coloured) EPAL
- 1st grade (light coloured) MIX
- 2nd grade (darker coloured)

The pallets of the first grade have been used no more than once or twice and are almost identical to the new ones. They can be used to ship goods anywhere in the world.

The second grade pallets have previously been repaired during their maintenance, several parts are replaced. They are normally used for storing or transporting cargo.

PREMIUM FIREWOOD

We only use healthy trees that guarantee high quality firewood and are of the same moisture, size and weight. Firewood is highly efficient due to its slow combustion. They are great for cooking, barbecue, and pizza ovens. In particular, for pizzerias, we specifically produce firewood without bark.

In our assortment there is both freshly chopped firewood (beech species) and firewood which has undergone chamber drying, with humidity up to 22%.

FIREWOOD DIMENSIONS:

■ 25 cm

■ 33 cm

■ 50 cm

PACKAGING DIMENSIONS:

■ 1M x 1M x 1M

■ 1M x 1M x 1,8M

■ 1M x 1M x 2M
